

JOSÉ FABIÁN SALCEDO ESTRADA

CDMX | +52 271-383-7820 | fabiestrada19@outlook.com | Professional ID: 15314484

PROFESSIONAL SUMMARY

Systems Engineer and Backend Developer specializing in C#, Java, Python, and high-demand relational databases. Combining advanced API development and POS system architecture with infrastructure management, cloud deployments (Azure), and network administration. Proven ability to translate robust software engineering into structural troubleshooting and operational continuity, effectively bridging the gap between software development and IT infrastructure.

PROFESSIONAL EXPERIENCE

Grupo CODA (Hutchison Ports ICAVE)

Veracruz, Ver *Web Developer Jr*

Jan 2025 – Jun 2026

- **Critical Application Management:** Managed the technical lifecycle of enterprise software in a high-demand port environment, ensuring operational continuity and proactive risk mitigation.
- **API Architecture:** Led the design, construction, and integration of REST and SOAP APIs from scratch, optimizing operational workflows through scalable architectures.
- **Cloud Deployments:** Administered CI/CD pipelines and production deployments in Azure, guaranteeing stable transitions following rigorous local environment testing.
- **Database & Server Optimization:** Enhanced Oracle database performance through complex business logic and ensured high availability on Apache Tomcat servers.

Coordinados de México Oriente, S.A de C.V (Mobility ADO)

Córdoba, Ver *Application Developer (Resident)*

Jul 2024 – Feb 2025

- **System Development:** Designed and engineered a comprehensive Occupational Security and Hygiene management system utilizing Java, JavaFX, and PostgreSQL.
- **Compliance:** Ensured the software solution met strict internal corporate standards, streamlining safety protocols and data management.

INDEPENDENT PROJECTS

Multi-Platform POS System

Backend & Infrastructure | 2026

- Architected a scalable Point of Sale (POS) system featuring a robust C# backend and a multi-platform frontend compatible with Windows and Android devices.
- Implemented Docker containers for seamless database migration and optimized cross-platform deployment strategies.

Professional Portfolio Website

Frontend Developer | 2026

- Developed a high-performance personal portfolio utilizing the Astro framework to showcase technical skills, continuous integration, and modern web development practices.

EDUCATION

Tecnológico Nacional de México (TecNM)

Orizaba, Ver | *Computer Systems Engineering*

2020 – 2024

- **Specialization:** Web Development and Security.
- **Key Projects:** Developed an interactive web application and video game utilizing modern tech stacks, targeting ADHD diagnosis and management.

TECHNICAL SKILLS

- **Software Development:** C#, .NET (Core/Framework), Java, Python, Node.js, TypeScript, JavaScript, React, Angular, Astro, Flutter.
- **Architecture & Integration:** REST/SOAP APIs, Microservices, OAuth2, JWT, POS Architecture.
- **Cloud & DevOps:** Azure (App Services, Functions, Static Web), Docker, Git, CI/CD Pipelines, Apache Tomcat.
- **Databases:** Oracle, PostgreSQL, MySQL, Stored Procedures, SQL Optimization.
